Co-relation of workforce with workload of dialysis.

Rank correlation coefficient between average monthly dialysis and manpower is 0.731 (p-value = <0.001). There is significant positive correlation between average monthly dialysis and manpower. Also Karl-Pearson's correlation coefficient between average monthly dialysis and manpower is 0.506 (p-value = 0.004). Significant positive correlation between average monthly dialysis and manpower. Below table shows average manpower vs average dialysis performed per month.

Average dialysis Per Month	No. of centers	Average Manpower
<200	2	3
200-1000	15	11
1000-2000	10	23
2000-3000	2	26
>3000	1	20
