

Supplementary Table 2. Possible causes of low-flow acute kidney injury (AKI) stratified by progression status.

Variables	AKI stage 1 (n= 217)	Did not progress (n= 146)	Progression to AKI 2-3 (n= 71)	<i>p</i> value
Diarrhea during the onset of COVID-19 (%)	24.0	28.1	15.5	0.044
Parenteral nutrition (%)	1.8	1.4	2.8	0.599
Pleural catheter use (%)	3.2	1.4	7.1	0.038

Variables are shown as percentages. *p* value: T chi².
